

A LETTER FROM OUR PRESIDENT

The changing situation that has resulted from the coronavirus (COVID-19) pandemic makes this a difficult, challenging and destructive time for millions of people around the world. We share your pain.

As the global effect of COVID-19 continues to evolve, CH Technologies (USA), Inc. is firmly committed to the health and safety of our customers, employees, and communities. We are closely monitoring the changing situation, and complying with public health guidance of global health experts at the World Health Organization (WHO) and U.S. Centers for Disease Control (CDC) on preventing the spread of the COVID-19 virus

However, in this time of crisis, we believe that we can perform essential services and must provide valuable research tools. Thus, CH Technologies (USA), Inc., as a global supplier of inhalation testing equipment for virology and microbiology, will remain open and available to provide goods and services while taking this pandemic seriously. Thus, we are taking the necessary precautions to prioritize the health of our employees, and of all those we meet. Over the next few months, we will be limiting our face-to-face interactions but we're still very much here for all of your needs. Our employees now work remotely and thus, we are able to meet with you by phone or through video teleconference.

We have implemented the required workplace healthcare practices at our and manufacturing facility as to make our workplace safe and healthy for the few of our employees who need to be on site to fill your orders. We must not underestimate the severity of the COVID-19 virus spread, and we sincerely appreciate the commitment of all of you who are addressing this health emergency.

Please stay safe and continue to practice social distancing. Continued mitigation and scientific research will save the day and carry us through this trying time. We thank you for your loyalty and hope to be of service for your research needs.

May we all be well and safe,

Thus, we remain, yours very sincerely,

Dr. Rudolph Jaeger and the staff of

CH Technologies (USA), Inc.
